

Interview Plan (Lita Oakes)

Greetings,

I would like to know if Lita faces any challenges with the existing website.

We will review the existing requirements and project scope that Lita shared:

- Pages: Home, About, Services, Resources, Contact.
- Booking System (Integration or Development).
- "Get Free Wellbeing Tips" Button.
- Online Chat.
- User-friendly Content Management System.

We will open the prototype that was built using the project scope: [Prototype Link](#).

Questions:

1. What do you want us to add, move, or modify from the prototype? Do you like it?
2. What will happen if someone clicks on the "Get Free Wellbeing Tips" button?
 - A form will appear with the text "Fill in your email to get Free Wellbeing Tips", a field labeled "Email", and a button labeled "Get".
3. Would you like to have an email list with people who signed up for the Free Wellbeing Tips?
4. About Page: Should we include the mission, vision, or history of the company? Staff details?
5. Would you like to have separate pages or pop-up forms for each service with detailed information and images?
6. Would you like to have a search field for clients to find resources they are interested in?
7. What will a resource consist of? Text, images, videos?
8. Would you like to have a Share button to easily share your resources on social media?
9. What fields should be included in the contact form on the Contacts page? Name, Email, Phone, Message?
10. If someone writes to you using the contact form, would you like to collect the email, or is it sufficient to just send the message to your email?
11. What social media links should we put on your website?
12. Would you like to have automatic responses in the online chat?
13. Would you like to have meetings with us where we provide updates on the current stage of the project, or are messages on WhatsApp sufficient? How often would you like to hear from us?

Thank you.
